Front-End Developer

PROFESSIONAL OBJECTIVE

I find a passion within software development, particularly in the Front-End area, where I continuously discover new tools, techniques, and best practices to enhance the quality of the products I develop.

WORK EXPERIENCE

Front-End – Upler – Buildathon – ETH Argentina 8/23 - Current

Project initiated for the Ethereum Argentina Buildathon, which is currently still in development. A platform that combines a software management solution with a vast marketplace where individuals can find all the software they need to work on their projects.

Technologies Used: Next Js, TypeScript, Tailwind, and Node Js.

PROYECTS

Front-End – Proyect Digital Booking – Digital House   19/10/2022 – 12/12/2022

A car rental system was developed.
Technologies Used: React Js, Java, Spring Boot, GitLab, AWS, Postman, MySQL, and Selenium.

EDUCATION

Certified Tech Developer (CTD) – Digital House – 2022 – Current

High School – Instituto Austral de Enseñanza – 2016 – 2021

SKILLS

Languages: Spanish – Native --- English – Level B2
Front-End: HTML, CSS, JavaScript, React Js, Next Js, TypeScript, Tailwind y Jest
Data Base: MySQL
Back-End: Java, Spring Boot, Selenium Web Driver
Work Tools: GitLab, GitHub, AWS y Docker
